Website Title: The-Offical-T-D-I-C-E.com

Organization Title: Tracking, Dragons, Inside, Center, Earth (T.D.I.C.E for short)

Logo:

Home Page Introduction: “Welcome to the T-D-I-C-E Organization! We are dedicated to the cause of tracking down the location of the dragons located in the center of the earth and we need your help! If you look through our website you will see the undeniable evidence of dragons living in the center of our earth and being the true reason behind global warming. After you finish exploring our website you’ll be able to officially join our cause and become a member of the organization.”

About Page: Summarized history of the organization that officially started in 1989 and their ‘accomplishments’. Then an overview of their current goals in the modern day, to reach the center of the earth, along with their main theory that dragons live in the center of the earth and are the reason behind global warming and earthquakes along with the ‘proof’ they have.

Memorial: Small section, near the end of the page where they will mourn the two founders of the organization, José Guapo (1965-2023) and Isabelle Diaz (1970-2023), they died while exploring a cave system that collapsed on them during an earthquake. It is commonly believed by most

members that the earthquake was actually caused intentionally by the dragons so that the organization would stop looking for them.

“Research”: All of this research and evidence provided will be obviously fake and that is very intentional as this theory organization is meant to be portrayed as a joke that takes itself seriously. They don’t have any real evidence of their own so they fake most of it though they do believe in their cause. So all the research is just facts they made up and fake pictures they created.

1. “Scientists have argued and provided evidence that global warming is real and they are correct! But what they got wrong was the true reason behind global warming. In the center of the earth, the dragons have been repopulating, and now that they are at max capacity their fire is starting to heat the center of the earth at an alarming rate! This is the true cause behind global warming and we have an image of what we believe that looks like. It was created by our expert digital artist.”

2. “We had a real-life photo of a dragon leaving a cave entrance but unfortunately that photo was taken in 1989 when the organization was first founded. So the photo had taken much damage over the years and became unrecognizable but luckily are expert artist was able to recreate its original beauty in digital illustration!”

3. “We do have one photo that had been taken some years ago in black and white in the middle of the night. If you look closely you can see what appears to be an infant dragon hiding in the background behind the tree! This alone should be enough proof that dragons are real.”
